

CONTENTS
RJNAMM Vol. 29 No. 5 (2014)

A. A. ANASHKINA, A. N. NEKRASOV The method for identification of hierarchical organization of protein sequences	265–273
L. B. KATSNELSON, N. A. VIKULOVA, A. G. KURSANOV, O. E. SOLOVYOVA, V. S. MARKHASIN Electro-mechanical coupling in a one-dimensional model of heart muscle fiber	275–284
N. V. PERTSEV, V. N. LEONENKO Analysis of a stochastic model for the spread of tuberculosis with regard to reproduction and seasonal immigration of individuals	285–295
V. N. RAZZHEVAIKIN The use of evolution optimality principles in simulation of structured biosystems	297–305
A. A. YANCHENKO, A. A. CHEREVKO, A. P. CHUPAKHIN, A. L. KRIVOSHAPKIN, K. YU. ORLOV Nonstationary hemodynamics modelling in a cerebral aneurysm of a blood vessel	307–317
K. M. ZAPOLSKI, YU. B. ADMIRALSKIY, A. S. BRATUS Hybrid cellular automaton method for homogeneous tumor growth modelling	319–329
